

PPL@Home Mobile Number Log In User Password Creation

Login/Registration Tool | Login/Registration Troubleshooting

PURPOSE

PPL is introducing an update to make your account even more secure. As part of this update, if you log into PPL@Home using your mobile number, you will be prompted to create a password and use it to log in going forward instead of a one-time verification code at log in. **You will only need to create a password one time.**

SECURITY TIP. The website address for PPL@Home will **always have 'pplfirst' in the URL.** Be aware of misspelled words or unfamiliar URLs as this may be a fake site designed to steal your sensitive data and information.

The prompt to create a password will happen for different users at different times, so if you don't experience it the next time you log in (or the time after that), don't worry! When it is your turn, you will see a simple prompt on the screen guiding you through the steps, and it only takes a minute.

1

As a mobile number user, when logging into PPL@Home, you will see a screen where you can enter your mobile number. Enter it in the field.

After entering it, click the **blue 'Continue' button**.

The image shows two screenshots of the PPL login interface. The top screenshot displays the 'Email or Phone Number' input field and a blue 'Continue' button. The bottom screenshot shows the same interface with the mobile number '8332475346' entered in the field. The 'Continue' button is highlighted with a yellow border, indicating it should be clicked.

2

Click the blue **'Send verification code' button**. This will send a one time, 6-digit passcode to the mobile number entered (as you have been doing).

The image shows a screenshot of the PPL login interface. The 'Send verification code' button is highlighted with a yellow border, and a mouse cursor is pointing at it. The mobile number '8332475346' is visible in the input field above the button.

3

Enter the 6-digit code in the field titled 'Enter verification code', then click the blue **'Verify code'** button.

If it **is your turn**, you will be taken directly to the create password screen.

The password must:

- Be between 8 and 64 characters
- Contain **any 3** of the following:
 - A special character
 - A number
 - An uppercase letter
 - A lowercase letter

Enter your password in the 'New Password' field, and again in the 'Confirm New Password' field.

Then click the **blue 'Continue' button**

SECURITY TIP. The strongest and most secure passwords avoid common words or phrases, repeating numbers, and names.

5

If the password you chose is valid and matches what you entered into the 'Confirm New Password' field, you will be immediately logged into PPL@Home.

If there is an issue with the password, it will ask you to try again.

Once successfully created, this will be your new password going forward. You will be asked to enter it any time you:

- Log in to PPL@Home.
- Log in to or set up the Time4Care app.

If you continue to have trouble:

- Contact PPL for help by calling **1-833-247-5346**.
- Contact PPL via email at **nycdpap@pplfirst.com**.
- Contact your **CDPAP Facilitator** (if you have one).
